

Maple Class trip to Escot 09.02.2017

Maple class had a fantastic trip to Escot, as part of Science week. Despite the cold weather everybody had fun running around the maze and poor Mrs North nearly got left behind whilst trying to rescue Josiah! After making some name badges out of wood the children then explored the woods where they fed wild boar, saw lynx, otters during feeding time and watched the very rare red squirrels in their enclosure. One of the highlights was roasting marshmallows on a camp fire and the day finished with a treasure hunt in the wetlands.

The purpose of this trip was to enhance and reinforce the children's learning about the environment, habitats, adaptation and food chains. As well as having lots of fun the children also gained confidence in being in the countryside.
